15 October 2009

Dear Paul

29TH ISES SOLAR WORLD CONGRESS 2009

Many years of planning created form to this very special event - SWC2009.

SWC2009 was supported by a team of highly skilled and experienced professionals that focused their strengths and energy on achieving the project goals and objectives. I am completely satisfied that we have indeed achieved all that we have set out to do – in certain instances, exceeded expectations.

Commendations and compliments are being received from delegates, speakers, exhibitors and media from across the world on a very well organised and presented event. As a valued member of the team, you should share in these accolades.

In the words of Monica Oliphant, ISES President, at the closing session yesterday, this will indeed be a hard act to follow. Personally, I believe we have set a new benchmark for SWC in general, having attended the previous Congress in Beijing.

Thank you Paul for all your efforts and guidance throughout this project – for being part of the team and always willing to seek solutions to our challenges.

I look forward to a working together with you and your team again on future projects.

Yours sincerely,

Pieter Swart, CMP
Congress Organiser: 29th ISES SWC 2009
